The Flipper Replacement

No More Flippers!

The Better Choice
for Partial Dentures.

Snap-It! is the ideal replacement for uncomfortable partial dentures or bulky flippers that make eating a chore. Finally, no more coverage of palate and gums with uncomfortable flipper appliances!

Snap-It! is surprisingly flexible yet incredibly strong and simply snaps into place over the patient's existing dentition, with NO prepping, NO injections and NO adhesives.

"Finally, a temporary partial replacement for a missing tooth that works! My patients love it! Snap-It! feels secure so they can speak and eat with it without worrying about it becoming loose and falling out. It's simple and literally snaps into place. Snap-It! is a great solution to no more flippers!"

—Dr. Terri Alani, Houston, Texas
